Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement filed 3-22-04 fails to comply with 37 CFR 1.98(a)(3) because it does not include a concise explanation of the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information, of each patent listed that is not in the English language. It has been placed in the application file, but the information referred to therein has not been considered.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-20 are rejected under 35 U.S.C. 102(e) as being anticipated by US Pub. 2004/0238762 issued to Mizoguchi et al--- a different inventive entity.

The applied reference has a common inventor with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

3. Mizoguchi et al disclose a EUV light source device having a target supply unit (21); a laser unit (25); and a collection optical system (34).

4. As per claims 2 and 19, Mizoguchi et al disclose a MOPA (see pg.7, claim 9).

5. As per claims 3 and 20, Mizoguchi et al disclose using a laser having a resonator (see pg. 6, para. 0135).

6. As per claims 4-9, Mizoguchi et al disclose a YAG laser (pg.5, para. 0110).

7. As per claims 10-17, Mizoguchi et al disclose a CO laser (pg. 6, para. 0135).

8. As per claim 18, Mizoguchi et al disclose also exposure lithography system having an illumination optical system (14) and projection optical system (19).

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Pat No 6,882,704 issued to Schriever et al; US Pat No 5,577,092 issued to Kublak et al; US Pat No 6,862,339 issued to Richardson; and US Pat No 5,991,360 issued to Matsui et al illustrated the state of the art.
